

Poison Prevention

A poison is any substance that can cause harmful effects in the body. Millions of people are unintentionally poisoned every year, and children under the age of six are at the greatest risk.

with you when stopping to answer the telephone or door. Most poisonings occur when the product is in use.

Poison Proof Your Home

-  *Keep all household poisons and medicines in their original containers.*
-  *Lock poisons and medicines out of the reach and sight of children.*
-  *To avoid confusion, do not refer to medications as “candy” or take them in front of children.*
-  *Never leave children alone with household products or medications. If you are using a product, take a child*

POISON

-  *Know which plants in and around your home can be poisonous and keep them away from children.*

-  *Take time to teach children about poisons.*

-  *Keep the number of your local poison center on or near the phone.♣*
